

StorageQuest DiscSign

Disk Labelling Simplified

Accurate, automatic labeling

StorageQuest DiscSign is simple a yet powerful Optical Media scanning and printing tool.

With a single exported media or even a sizeable stack of media, DiscSign can progressively analyze a disc and print the results directly onto the scanned media. Simple and effective.

Labelling your media is as important as having it in the first place! Imagine trying to label all of your exports by hand. This is not only a tedious process but it is an error prone one.

DiscSign has been designed to be used with (but not limited to) optical media publishing systems like the MSM software and our new Optical Volume Manager(OVM).

Key Features and Benefits

- **DiscSign is an automated** disc label printing system.
- **This software** is intended to be used in a fully automated non-user intervention way.
- **DiscSign** is compatible with a broad multitude of formatted media.
- **Avoid tedious** self labelling by hand
- A wide range of media is supported including **CD/DVD/BD**
- **Long term preservation** of records is easily achieved with archival-grade media, allowing your data to survive for decades.

Industries and Common Use

- **Enterprise, medium/small business and home use**
- **Law enforcement, government, medical, etc..**
- **Labelling for long term Archiving and tracking**
- **Export for offsite use**

StorageQuest DiscSign

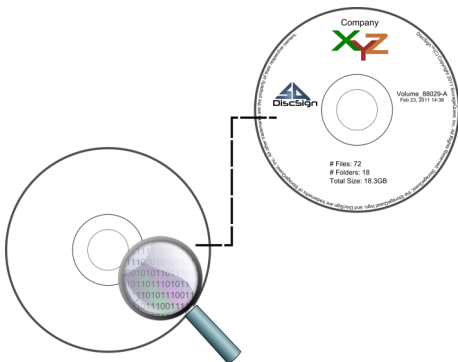

Disk Labelling Simplified

Track down your exported media easily

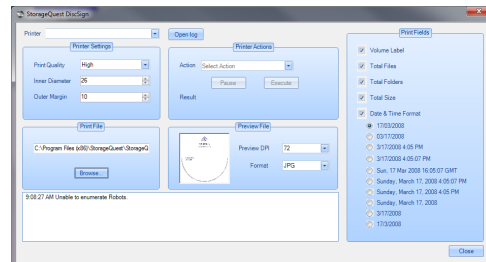

StorageQuest Optical Volume Manager uses the industry-standard UDF file system, supported by nearly all computers and operating systems. This allows the media to be read in virtually any Blu-Ray drive with no need for special software. The virtual drive can be shared over the network to all your client and server computers.

Customization

Using your favourite label design editor and DiscSign you can customize the label's design and choose what you want included in DiscSign's analysis.

Configurability

- Default print file
- Print Settings
- Printer Actions
- Print Fields
